OS ORANGE PROBLEM

TANISHA DALMIA
PES2UG24CS550

CODE:

```
/*
* ============================================================
*  SUPERCELL BACKEND — Clash Royale Custom Server Engine
*  Build Version: 2.3.1-PES
* ============================================================
*
* INSTRUCTIONS:
* 1. Replace STUDENT_SRN with your full SRN string.
* 2. Fill in the 5 TODO sections to make the battle server
*    functional.
* 3. Consult the "Appendix" in your problem statement for
*    technical hints.
* 4. Compile: gcc clash_server.c -pthread -o clash
* ============================================================
*/
